Hands on Projects

- Built a template school website from scratch using HTML to create different sections of website, CSS to style the website to look professional, attractive, and being responsive to all devices including desktops, laptops, tablets and smart phones. Finally added JavaScript to make the website interactive.
- Designed face book social media look alike website using HTML, CSS and JavaScript functionality.
- Built a fully responsive modern UI/UX website in React JS followed by BEM Guide when giving it some styles.
- Built a fully responsive modern restaurant application using React JS and react icon library.
- Built a fully responsive website with modern UI/UX in React JS and Tailwind CSS.
- Designed a React JS website, Mobile Responsive Project along with Tailwind CSS, pulling all of the data/images from data.js file to simulate an API response and filter through data/images using JavaScript filter array method.
- Built an E-commerce website application using Next JS, Commerce JS with integration of stripe JS as a payment gateway.
- Developed Real Estate website application using Next JS, Material UI which uses bayut API to query real estate in UAE and has the functionality of buying and renting properties on the website.
- Built a simple full stack expense tracking website which track buying/deposit expenses using React JS, data can be fetched from the database, and Register/Login authentication using a cloud-hosted database (Firebase).
- Developed a smooth Administration user interface dashboard that provides management tasks such as Products management, Transactions, and user analysis using React JS, Chart JS and React Router to navigate between the pages.
- Implemented fully responsive websites, and landing pages from concept through deployment.
- Developed contact application that adds contact to the web page that is being fetched from redux store.
- Developed a redux social app that comprises of posts, notifications, users, with timestamp features. Redux application fetches data from server using fake data from faker.js.
